

Senator Malcolm Roberts
One Nation Senator for Queensland

7 January 2022

The Hon. Scott Morrison MP
Prime Minister of Australia
PO Box 6022
House of Representatives
Parliament House
CANBERRA ACT 2600

Dear Prime Minister

Our constituents are shouting their concern and need for the immediate restoration of basic human rights and freedoms, lifestyle and safety.

Constituents want an end to segregation, discrimination and unwarranted damaging control under vaccine mandates and an end to the contradictions, hypocrisies and confusion engulfing politicians and health advisers.

Constituents see that restoring freedom, choice and personal responsibility is the way to make 2022 the year people get on with their lives. I agree.

Australian health advisors and politicians have had almost two years to review the data and the research, and to understand people's needs on COVID-19 vaccinations.

Robert Kennedy Jr's authoritative, detailed, validated book "The Real Anthony Fauci" documents the inhuman corruption among senior USA health bureaucracies overseeing COVID-19 vaccine provisional approvals.

In brazen conflicts of interest, taxpayer-funded health agencies have become money-making arms for major pharmaceutical companies. Some senior bureaucrats overseeing pharmaceuticals benefit financially from vaccine research and approvals. This is also true in Australia, with no ongoing independent validation and oversight for conflicts of interest.

Kennedy documents America's perversion of medical governance over four decades based largely on many repeated false or exaggerated claims of virus/disease threats. This led to corrupt approval of ineffective and dangerous COVID "vaccines" in America, bypassing proper testing and approval processes while hiding massive adverse effects, including many deaths.

The litany of American fraud, corruption and human atrocities over the last forty years has cost many thousands of lives and adversely affected millions of people in the USA, Australia and globally. Robert Kennedy Jr's book authoritatively raises the spectre of genocide and of racist killing of African-American, African, Indian, Hispanic and other babies and children in "testing" of vaccines.

Yet the Australian Therapeutic Goods Administration (TGA) hastily and provisionally approved the major pharmaceutical companies' COVID "vaccines" based merely on a literature review, seemingly weighted heavily to the deliberations and verdicts of American approval agencies. Australian health agencies did no independent testing and evaluation before granting provisional approvals.

Yet on this basis state governments implement vaccination mandates that the federal government enables and effectively supports, despite your false claims that there are “no vaccine mandates in Australia”.

A second corrupt American tactic to drive vaccine profits has been the banning of proven safe and effective early treatment, drugs and protocols. Your government and agencies have similarly been complicit in banning such treatments instead of proactively seeking, proving and assuring supply of these medicines for early treatment and prevention to keep Australians safe. Other nations’ governments have taken such action to safely protect their citizens.

You and your departments have said the benefits of COVID vaccines outweigh their risks, yet a growing international body of evidence points with increasing confidence to the need for you to reassess your assumptions. Despite this strong evidence you are still pushing people toward early death.

In mandating COVID vaccinations using the coercive threat of denying people’s livelihoods and basic human rights and freedoms, you are culpable for needless deaths and serious injuries to thousands of Australians. Yet you continue to persecute Australians who have informed themselves about the life-threatening reality of COVID-19 vaccines having severe adverse effects despite limited and rapidly declining vaccine efficacy.

I urge you to immediately stop the vaccine mandates that Premier Palaszczuk says are in line with your so-called “national cabinet”. I urge you to instead develop an honest and comprehensive plan letting people get back to work while providing focused treatment and protection for the sick and vulnerable in ways already proven in other nations - yet negligently not adopted in Queensland or Australia. People need and deserve a proper comprehensive long-term plan for real care.

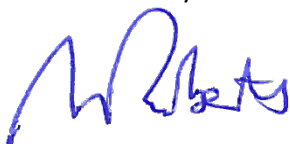

There are no scientific or medical grounds for the division of our society, communities and businesses based on “vaccine” status. Vaccine mandates are a tool for coercion to condition and control people.

You, the Premiers and health officers have said we need “to live with COVID-19”. Health officers have made similar statements. That means there is no need for emergency declarations whose only purpose is to enable coercive mandatory vaccination.

After two wasted years, people’s lives and livelihoods are being decimated. Vaccine mandates are crippling hospitals and health care, emergency services, jobs, businesses and communities because governments have been ignorantly reacting to the virus and not managing the virus. Instead of controlling the virus, governments have controlled people – and have done enormous damage.

Australians want the return of our Australian way of life, free of coercive and debilitating lockdowns and vaccine mandates. People want honesty and accountability. I ask you to take action to end the divisive and harmful vaccine mandates immediately.

Yours sincerely

Malcolm Roberts
Senator for Queensland
