**QUESTION ON NOTICE**

**Supplementary Budget Estimates 2022 - 2023**

**Infrastructure, Transport, Regional Development, Communications and the Arts**

**Committee Question Number: 149**

**Departmental Question Number: SQ23-003393**

**Division/Agency Name: Agency - Civil Aviation Safety Authority**

**Hansard Reference: Written (28 February 2023)**

**Topic: CASA - Medical instances reported**

**Senator Malcolm Roberts asked:**

Please provide, by year for the most recent 5 years, how many instances have been reported to CASA of:

- a. Pericarditis and myocarditis;
- b. Thrombosis with thrombocytopenia syndrome;
- c. immune (idiopathic) thrombocytopenic purpura;
- d. Capillary leak syndrome;
- e. Guillain–Barré syndrome;
- f. any cardiac related conditions or injuries;
- g. any immune related conditions or injuries.

**Answer:**

The Civil Aviation Safety Authority’s medical records system does not capture information on these specific conditions or diseases in a way that enables the data to be accurately reported without a manual review of clinical notes for many thousands of assessments.
